

## **My dog – By Anna Poynter**

My little dog is wonderful,  
when she gives you that special look  
you know her mood is playful  
And you are on her hook.

She was tiny when we got her,  
could not use the stairs,  
pleaded “I know nothing” syndrome,  
but “I like biting chairs”.

After two months she has changed.  
and is very clean and loving,  
she likes it when her walks are pre-arranged  
to her liking, as she is cunning.

I took her to puppy training.  
They taught me well how to behave.  
Walks are now without my shoulder straining  
and she knows what to do when I wave.

Our dog sleeps next to our bed  
And is very good all night  
You would think she was dead  
Until the dawn of daylight.

No cages for our dog  
Just lots of love and care  
In the mornings she loves to jog  
And enjoys the fresh air.
